Inspection report													
Check results													

**Annex A: list of items to be inspected**  
For regular inspection, the following items shall be taken into account:

**Using the ladder**

- Do not exceed the maximum total load.
- Do not exceed the maximum number of users (1 user at a time).
- Stabilise the leaning ladder while stepping off.
- Do not stand on the top two steps/rungs of a standing ladder without a platform and a hand/knee rail.
- Ladders should only be used for light work of short duration.
- Do not use the ladder outside of adverse weather conditions, such as strong wind. For outdoor use caution to the wind.
- Take precautions against children playing on the ladder.
- Do not ascend or descend unless you are facing the ladder.
- Keep a secure grip on the ladder when ascending and descending.

**Positioning and erecting the ladder**

- Open the ladder fully before use.
- Use the ladder with restraint devices engaged only.
- Do not use the ladder on a uneven or uneven base.
- Ladder shall never be repositioned from above.
- When positioning the ladder take into account risk of collision with the ladder e.g. from pedestrians, vehicles or doors. Secure doors (not fire exits) and windows where possible in the work area.
- Warning, electricity hazard. Identify any electrical risks in the work area, such as overhead lines or other exposed electrical equipment and do not use the ladder where electrical risks occur.
- Use non-conductive ladders for unavoidable live electrical works.
- Ladder shall be stood on its feet, not on the rungs or steps.
- Do not erect ladder on contaminated ground.

**Before use**

- Do not use the ladder if you are not fit enough. Certain medical conditions or medication, alcohol or drug abuse could make ladder use unsafe.
- Do not use the ladder if you are not fit enough. Certain medical conditions or medication, alcohol or drug abuse could make ladder use unsafe.
- Do not wear unsuitable footwear when climbing a ladder.
- Do not spend long periods on a ladder without regular breaks (tiredness is a risk).
- Do not carry equipment which is heavy or difficult to handle while using a ladder.
- Avoid work that imposes a sideways load on ladders, such as side-on drilling through solid materials.
- Do not modify the ladder design.
- Do not move a ladder while standing on it.
- If a ladder is delivered with stabilising bars and these bars should be fixed by the user before the first use this shall be described on the ladder and in the user instruction.
- Do not step off the side of standing ladder onto another surface.
- Standing ladders shall not be used as a leaning ladder unless it is designed to do so.
- Any horizontal surface which looks like a platform on a standing ladder that is not designed for standing on (e.g. a plastic work tray) shall be clearly indicated on that surface (only if necessary due to design of ladder).

**After use: maintenance and storage**

- Repairs and maintenance shall be carried out by a competent person and be in accordance with the producer's instructions.
- Make sure that ladders are duly sheltered from any damages that may occur during transport and storage; keep the ladders taking shelter from the bad weather.
- Ladders for industrial purpose are to be inspected for industrial purpose are to be inspected at regular intervals by a qualified person to establish that they are in a safe condition in accordance with occupational health and safety legislation.
- These are the essential characteristics which have been certified the mechanical safety of the hinge devices, the safety of the various components of the ladder.
- Make sure that ladders are duly sheltered from any damages that may occur during transport and storage; keep the ladders taking shelter from the bad weather.

Warning, fall from the ladder. Refer to instruction manual/booklet.
